## National Public Seating Presents “The 82MS in Musical Form”

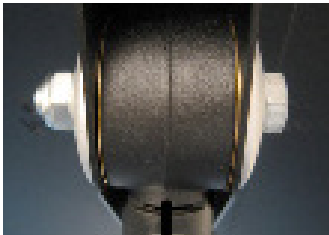

We would like to thank you for making our debut of the Melody Music Stand a major success. Your comments and feedback have always paved the way for perfection and much of your suggestions have been adapted in our new enhanced offering.

*Please review the exciting updates below:*

### Reading Surface

Reading surface is manufactured with a strong lightweight aluminum providing extra strength and durability.

### Neck Assembly

The new neck assembly provides an even tighter fit on the pole. An aluminum cap washer has been added which will prevent any possibility of peeling paint.

### Pole Mechanism

With the updated spring loaded mechanism, we guarantee that the height adjustments (available from 24” to 46”) will be extremely smooth and quiet.

### Adjustable Pole

Smooth tight fit allows for ease of use in quiet musical environments.

### Cap Washer

Aluminum cap washers used for neck assembly prevents loosening.

### Base Hardware

Base hardware and threaded insert is electroplated to prevent any harmful exterior elements from seeping into the unit.

Enhanced lock washer is used for base bolt to prevent loosening.

We hope that the students using these stands attain the same level of clarity and tone as we have accomplished in manufacturing this product.

We wish you success as you specify projects utilizing our Melody Stand and encourage you to request samples to demonstrate to your customers the superiority of this product.

---

**Thank you,**
